3D Systems Brings Affordable 3D Content-To-Print Solutions To FABTECH

- Performance And Productivity In Full Color Take Center Stage -

ROCK HILL, South Carolina, March 20, 2012 – [3D Systems](#) Corporation (NYSE: DDD) announced today that it will showcase its complete line of personal and professional 3D printers together with its content-to-print solutions at FABTECH Canada March 20 – 22, 2012, at the Toronto Congress Centre, Toronto, Ontario, Canada in booth #1133.

The company plans to display its most affordable full-color 3D printing solution, the [ZPrinter® 250](#) along with the [3DTouch™](#), a 3D printer that fits every budget. 3D Systems is offering attractive packages that combine the precision of its [ProJet™](#) printers with the productivity and full-color of its [ZPrinters®](#) at price points designed to help engineers shave time and money off their demanding development schedules. With access to [Quickparts®](#) on demand parts service and the portable [ZScanner®](#) for reverse engineering and inspection, attendees can tap into the most complete range of affordable 3D content-to-print solutions available on the market today.

“The impressive range of integrated 3D content-to-print products and services that we will showcase at FABTECH cover the entire product design to production process, delivering affordable full-color models, precise high-definition functional parts and intuitive content creation and capture tools,” said Cathy Lewis, Vice President of Global Marketing, 3D Systems. “We are fully committed to democratize access to these powerful solutions for the benefit of professionals and consumers alike.”

About 3D Systems Corporation

3D Systems is a leading provider of 3D content-to-print solutions including 3D printers, print materials and on-demand custom parts services for professionals and consumers alike. The company also provides creative content development, design productivity tools and curation services and downloads. Its expertly integrated solutions replace, displace and complement traditional methods and reduce the time and cost of designing new products by printing real parts directly from digital input. These solutions are used to rapidly design, communicate, prototype and produce functional parts, empowering its customers to create with confidence.
